game is eliminate from being  
into rich humus. There  
ways to compost: aerobic (with air)  
and anaerobic (without air).  
one form of them the  
should decompose and be ready  
use in about three to four  
when it turns dark brown,  
and earthy smelling, it's ready  
the garden. With so many gardens  
in Willsburg, this method  
our environment stay beautiful.

**Fishing Update:** Anglers  
trout are assaulting hooks  
**Creek.** Free of ice, some  
hottest trout fishing in the  
will be at the lake as it warms.  
Anglers will be jigging for  
at the north end. The dock  
and the park is open for business.  
Already soaking baits at the  
and at the park, fishermen are  
ing up some fairly decent catches.
